

Online Registration - Custom Fields by Play Level & Age Group

When setting up custom fields for online registration, you will now have the option to indicate which play levels and/or age group each question applies to. By default a custom field will apply to all. Once the custom field is created you will see a button at the bottom of the custom field configuration which allows you to limit what play level or age groups this question applies to:

Season Custom Fields Fees Discounts Fields Billing Travel Requests

Use this form to edit the Club's custom fields. Custom fields will be asked on the player and administrator applications, and will be added to all of the administration screens. Some field types require you to input field size, and others require you to input a list of options for the user to select from.

Example:

Radio Buttons
 Option 1 Option 2 Option 3

Check Boxes
You can use one checkbox by itself for a single-choice selection of opposite choices, such as those that can be answered with "yes/no," "true/false," or the "not" of the indicated choice. Since the label of a single checkbox will only identify one of the two choices, make sure your users understand what the unchecked choice means. It would probably be inappropriate to use a single checkbox for the choice "A4 Paper" for example, because the paper size represented by the unchecked state would be ambiguous to most users. If there is any doubt whether users will understand both choices from a single label, use two radio buttons instead. Then both choices will be explicitly labeled. Checkboxes can also be used to select multiple items. For example: If you wanted the user to pick between two colors red and blue. You would not use checkboxes. Because the user would be allowed to choose both.

Radio button
Use a group of radio buttons when only a single choice is allowed, and when one choice must be selected. Limit the number of radio buttons in a group to a relatively small number, such as five to seven, to facilitate visual scanning and selection.

Internally you will see all custom fields under the player's application. Additionally, when on the My Account screen all custom fields for the club will be displayed. Nevertheless, the above functionality will limit what is seen during the online registration process.
