

INCLEMENT WEATHER:

The limited amount of time available for the tournament requires that extraordinary efforts be made to finish games on the day they are scheduled. As long as dangerous conditions do not exist, games must be played, even if extensive delays are encountered. Participating teams should be prepared for such delays.

Because of possible weather problems, the following will apply:

- a. Games may be shortened, teams will be advised.
- b. Scores of games at or beyond half time shall stand as complete.
- c. Games called because of dangerous weather prior to half time will be decided by FIFA Kicks from the mark.
- d. Games that cannot be decided by kicks from the mark due to dangerous weather or darkness will be determined by coin toss.
- e. When FIFA Kicks from the mark are used in lieu of games because of weather/field conditions, the following modifications to Kicks from the Mark will be used.

Round-robin play-

5 players from each team will kick and the game score will be recorded exactly as the result of the kicks (i.e.: score recorded as 3-2 instead of 1-0 for the winning team). If the score is tied after 5 kickers, another set of 5 from each team will kick. If the score is still tied after 10 kickers have completed their kicks, the tied score will stand (tied scores are allowed in round-robin games).

Semi-finals-

5 players from each team will kick and the game score will be recorded as 1-0 for the winning team. If the score is tied after 5 kickers, each team will continue to take one kick each, until there is a winner.
